

# Beyond Walls: immersed experience in PAHO Virtual Reality Laboratory

Dr. Juliana Leite

Laboratory Response Team  
Infectious Hazard Management (IHM)  
PAHO Health Emergencies Department (PHE)

# Virtual Reality Laboratory Experience

## Concept:

- A fully immersive laboratory experience
- Developed under the PAHO/WHO framework: strengthen regional preparedness and build resilient, sustainable laboratory systems.
- Aligned with the objectives of PAHO Strategic Plan 2025–2030 for an Integrated Public Health Laboratory System in the Americas.

## A new approach to engage, connect, and strengthen laboratory capacity:

- Navigate through rooms and interact with equipment and instruments.
- Access technical documents, infographics, and training videos.
- Find key materials: WHO/PAHO manuals, IHR documents, biosafety and biosecurity guidelines, publications from SARInet and PAHOGen.
- Learn through practical exploration.

# Virtual Reality Laboratory Experience

## What You Can Experience:

- Interact with equipment, instruments, and documentation
- Tap hotspots to open:
  - Info | Instruments | Equipment |
  - Videos | External links | Documents | Manuals

## Looking forward:

- Promote sustainable, resilient regional laboratory systems
- Support epidemic and pandemic preparedness and response
- Strengthen the capacity of National Influenza Centers (NICs) and National Reference Laboratories
- Inspire collaboration and continuous learning.
